- You are pregnant or nursing. (You cannot have this service. No exceptions.)
- You have Diabetes type 1 or 2 (due to slow healing and infection, color may or may not retain well).
- If you are under a doctor's care and have questions at ALL about being able to have this procedure, it is your responsibility to meet with your doctor and get written approval.

*** Please note that even if none of the above apply, eyebrow tattooing cannot be guaranteed. This is a cosmetic tattooing procedure, the skin can be unpredictable, it is up to your skin to retain the pigment. Generally, results are successful, however, due to skin type, healing or bleeding during procedure, some results can differ**
